

Welcome to SEAC!

*"A child is like a butterfly in the wind.
Some can fly higher than others,
But each one flies the best it can.
Why compare one against the other?
Each one is different.
Each one is special.
Each one is beautiful."*

The Special Education Advisory Council (SEAC) is a group that provides input on special education issues for our local school district and advises the school district on the development of programs and services to meet the special educational needs of children and families.

Purpose

- Promote collaboration within the district and between the district and parents.
- To advise and advocate for students with disabilities and their parents.
- To inform, support and advise district staff, parents and students in regard to school success for students with disabilities.
- To collaborate with other parents and district staff to promote best practice models district wide for students in special education.
